Y para los sobes de 1800x800, 1600x800, 1200x600 y 1500x1200 disponibles también en vidrio de colores cobre, blanco y negro, securizado de 10 mm. y vitrificado. **Modesty Panels** in 19mm melamine and 0.8mm PVC edges in Silver finish with or 1.5mm metal modesty panels finished in Silver Epoxy paint (RAL 9006). **K4:** 60x40x2mm steel tube crossbar and fittings in a 60x60x2mm tube, finishes in Epoxy paint RAL 9006 (Silver), Ral 9016 (white) or chrome. Each pole leg is fitted to the crossbar by means of an injected aluminium piece and fixed by M8 bolts. This item can be polished, or painted in Epoxy paint Ral 9006 (Silver) or in Epoxy Ral 9016 (White). The crossbars are joined together by means of an 0.8mm thick steel beam frame in silver paint (RAL 9006) that allows for cable management. This is a total modular frame that allows for the composition of one or more workstations altogether. Pole leg frames can also be height adjustable (min 629mm - max 806mm) or height-adjustable Ø60mm soft-tread castors (H: min 707mm - max 884mm), every 16mm by M6 bolts. **Desk Mounted Screens** made of 25mm melamine panel and edges of 2 and 0.8mm. Available finishes: White, Grey, Beech, Maple, Pear, Wengue and Silver. Two types of screens; a) with two profiled aluminium frames to hang accessories. Accessories in translucent finish, b) without aluminium frames. **Complements**, such as *rectangular and bow fronted wings, executive elements and semi-circular and semi-elliptical angles* made of 25mm melamine panels and edges of 2mm. Available finishes; White, Grey, Beech, Maple, Pear and Wengue .They are linked to the main top by means of metal plates. **Boardroom Table Tops** made of 25mm melamine panels and edges of 2 and 0.8mm and finishes in White, Grey, Beech, Maple, Pear and Wengue. Steel foot, with a 565mm base and 76 mm pole leg. Finishes in Epoxy paint Ral 9006 or chrome. Also tops and complements available in stratified. **(Optional)** Anodised aluminium **desktop cable management channel**, with removable aluminium grooves that allow for the installation of different accessories, such as switches, pin sockets or tel /data connectors. The middle channel between the cable slots allows for the installation of desktop panels. Aluminium caps placed at each end of the desk tops allow for the fixing of the desktop panels and are also used as an end cap for the cable management channel.

DESK TOP SCREENS: Desk Top Screens (Front position) available in three different heights: 28,5, 64,6 and 105cm that combine with 800, 1200, 1400, 1600, 1800mm width tops. The total thickness is 28mm. These screens consist of one or various panels in

different materials that are mounted on an aluminium frame finished in Silver Epoxy paint (RAL 9006). The different materials used for these panels are: 25mm melamine boards in White, Grey, Beech, Maple, Pear, Wengue and Silver; Upholstered panels in Series 1 and 4 fabrics; Clear or translucent Methacrylate. The same screen can be finished in one or different materials and the aluminium rails allow for storage accessories and an overhead bookcase, a metal shelf or a light kit. Only available in translucent finish. **Desk Top Screens (Side position)** are 28,1 cm high and combine with 60 or 80cm deep tops in 19mm melamine tops and top edges of 2mm and the rest in 0.8mm. Finishes available: White, Grey, Beech, Maple, Pear, Wengue and Silver or Translucent Methacrylate of 4mm. The fixing of these desktop screens to the main tops is fitted by two aluminium clips finished in Silver Epoxy paint (RAL 9006).
